Introduction

Not Yet Built Data Information

This guide provides an overview of the United Kingdom with Not Yet Built (NYB) Additional Dataset.

For general information about the United Kingdom (GBR Address) data, see the United Kingdom Data Guide. For information about a specific Additional Dataset, see the relevant Additional Data Guide.

You must have the GBR Address Dataset installed to use the NYB Additional Dataset.

NYB Not Yet Built Additional Dataset

Dataset Code:	NYB
Filenames:	gbrnyb.ads, gbrnyb.zlx
Approximate Data Size:	6MB
Data Source:	Royal Mail. All data, extracts and updates © Royal Mail Group plc.
Update Frequency:	Monthly or quarterly.
Expiry:	The quarterly data release dates are: • March • June • September • December Data files will expire 8 months after creation. For example, March data will expire in November of the same year. Ensure every data update is applied promptly, otherwise the data may expire and the product will become unusable.

The Royal Mail's Not Yet Built data contains address information relating to properties which are either still at the planning stage or which are under construction. Once a property starts receiving mail, the corresponding address record is deleted from the NYB data and is added to PAF instead.

About This Data

Area Covered

The Not Yet Built Additional Dataset contains information for addresses in the following areas:

Name of Dataset	England	Scotland	Wales	N. Ireland	Isle of Man	Channel Islands
NYB Not Yet Built	√	√	√	√		

Address Elements

The NYB data returns the same address elements as the GBR data. For a full list of these elements, see the *United Kingdom Data Guide.*

About DataPlus Information

You can configure your Experian products to use any of the DataPlus sets that are available for GBR Address data and the Not Yet Built Additional Dataset. Please refer to the relevant section of the product documentation for information on how to configure Experian products to return DataPlus information.

Each DataPlus set is divided into one or more items. Experian products can be configured to return these items via the Configuration Editor (using the element name) or the configuration file (using the code name). This section details the DataPlus set currently available for the Not Yet Built Additional Dataset.

DataPlus Sets for Not Yet Built Data

One DataPlus set is available with NYB data. This is the GBR Not Yet Built dataset.

GBR Not Yet Built

Identifier: GBRNYB

The GBRNYB DataPlus set returns a flag to indicate whether the data source for an address record is Not Yet Built.

Element	Code	Description
Not Yet Built	NtYtBlt	If the address record is from NYB data, this will display as YES

Using This Data

This section provides information on using the United Kingdom with Not Yet Built Data Additional Dataset with Pro, Pro Web and Batch.

> These searches are accurate at the time of writing. However, search results may differ depending on the data release you are using.

With Pro

Search Examples: Typedown

The following table provides the following search examples using Not Yet Built data:

- Full address known
- Postcode not known

Search Type	Example

Full address known	1. Enter the postcode **tn25ry** and press **Enter**.
	2. Enter the premises number **48** and press **Enter**.
	3. Six apartments are returned at this address: double-click on **Apartment 2**.
	4. The correct address is returned:
	
	    Apartment 2, Foxcroft Court
	    48 Underwood Rise
	    TUNBRIDGE WELLS
	    Kent
	    TN2 5RY

Postcode not known	1. Enter the location, **livingston**, and press **Enter**.
	2. Enter the street name, **queens crescent**, and press **Enter**.
	3. Enter the premises number **181** and press **Enter**.
	4. The correct address is returned:
	
	    181 Queens Crescent
	    Livingston
	    West Lothian
	    EH54 8EJ

Search Examples: Single Line

The following table provides a list of these example search types:

- Full address known

- Sub-premises known

- "Postcode not known" on page 7

- "Character missing from address" on page 7

- "Address contains spelling mistake" on page 8

Search Type	Example
Full address known	1. Enter the premises number followed by the postcode: **11a, sm13ld** 2. The correct address is returned: 11a Aultone Way SUTTON Surrey SM1 3LD
Sub-premises known	1. If the full address contains known sub-premises, enter the sub-premises followed by the premises number, then the town or postcode: **flat 7, 506, birkenhead** 2. The correct address is returned: Flat 7, The Grange 506 Old Chester Road BIRKENHEAD Merseyside CH42 4PE
Postcode not known	1. If the postcode is not known, enter the premises number and street name followed by the locality: **1 Viking Way, Aberdeenshire** 2. The correct address is returned: 1 Viking Way PETERHEAD Aberdeenshire AB42 2UB
Character missing from address	If one character is missing from the address the unknown character can be replaced with a question mark. Enter **w?ken field, high cross lane** and the correct address is returned: Wyken Field, High Cross Lane High Cross, Shrewley WARWICK CV35 7BE

Search Type	Example
Address contains spelling mistake	Entering an address that contains one or more spelling errors can still return the correct address. Entering **26 rowentree drive, west yorkshire** will still return the correct address: 26 Rowantree Drive BRADFORD West Yorkshire BD10 8ES

With Pro Web

Scenarios

The following table indicates the relevant search examples for each Pro Web scenario and search engine that supports GBR Not Yet Built data.

Scenario	Search Engine	For search examples, see:
Web: Address Capture	Single Line flattened	Single Line search examples in the *United Kingdom Data Guide*.
Web: Address Verification	Verification	Verification search examples in the *United Kingdom Data Guide*.
Intranet: Rapid Addressing - Standard	Typedown Single Line hierarchical	Typedown and Single Line search examples in the *United Kingdom Data Guide*.
Intranet: Rapid Addressing - Single Line	Single Line hierarchical	Single Line search examples in the *United Kingdom Data Guide*.
Intranet: Rapid Addressing - Bulk Processing	Verification	Bulk Processing search example in the *United Kingdom Data Guide*

Search Examples: Verification

Verification searching with Not Yet Built data works in the same way as with GBR data. For Verification search examples, see the GBR Data Guide.

Search Example: Bulk Processing

Bulk searching with Not Yet Built data works in the same way as with GBR data. For Bulk Processing search examples, see the GBR Data Guide.

With Batch

> If you are using Batch to clean your database against more than one dataset, DataPlus information cannot be configured.

This section details information relevant to using Batch with the United Kingdom Not Yet Built Additional Dataset.

If your database contains information on properties in the planning stage or under construction and you have the United Kingdom Not Yet Built Additional Dataset, Batch can use this extra information to increase the likelihood of obtaining a match.

With Batch Interactive: Search Examples

For information on searching United Kingdom addresses using Batch Interactive, see Typedown search examples on page 6 and Single Line search examples on page 7
